

# The G-20 Virus

Kevin Mugur Galalae  
(22 May 2020)

Covid-19 is a political disease invented to accomplish the sustainability agenda, which has four overarching objectives: depopulation, decarbonization, globalization, and digitization.

First and foremost, the fake covid-19 pandemic is meant to reduce greenhouse gas emissions by greatly reducing the capacity and output of entire industries deemed non-essential, bankrupting tens of thousands of companies, putting half a billion people out of work, and subjecting the rest of the global population to severe economic uncertainty and duress; all of which will result in a much lower overall carbon footprint as a result of lower individual consumption patterns and thus a giant step forward towards a neutral carbon economy.

The fake pandemic provides the plausible deniability governments need to preserve the illusion of legitimacy and the rule of law while conducting a global program of industrial sabotage – or creative destruction – that will allow them to restructure the global economy according to the sustainability agenda and the decarbonization prerogative. This strategy is the hallmark of all covert methods of depopulation, which is now extended to also cover the decarbonization agenda.

Since the G-20 nations are responsible for the vast majority of greenhouse gas emissions, namely 74%, it falls upon them to make the greatest sacrifices in order to address this problem before the climate heats up by more than 1.5 degrees Celsius and the planet's life support systems are damaged beyond repair.

That the G-20 nations are indeed making the greatest sacrifices is revealed by the fact that they are registering the greatest number of covid-19 infections (83% of the global total) and deaths (92% of the global total), be they real or manufactured, which in turn allows them to cause the greatest economic damage to their own economies and thus the greatest reduction in greenhouse gas emissions.

As such, covid-19 should be renamed the G-20 Virus or the Decarbonization Virus.

Here is the data as of 22 May 2020:

G20 member states	Covid-19 top 20	# of infections and deaths
1. USA	1. USA	1,621,333 / 96,363
2. EU	2. EU	1,161,804 / 123,888
3. Russia	3. Russia	326,448 / 3,249
4. Brazil	4. Brazil	310,921 / 20,082
EU member	5. Spain	280,908 / 27,940

5. UK	6. UK	250,908 / 36,042
6. Italy	7. Italy	228,006 / 32,486
7. France	8. France	181,826 / 28,215
8. Germany	9. Germany	179,110 / 8,310
9. Turkey	10. Turkey	153,548 / 4,249
	11. Iran	131,652 / 7,300
10. India	12. India	119,419 / 3,599
	13. Peru	108,769 / 3,148
11. China	14. China	82,961 / 4,634
12. Canada	15. Canada	81,324 / 6,152
13. Saudi Arabia	16. Saudi Arabia	65,077 / 351
14. Mexico	17. Mexico	59,567 / 6,510
	18. Chile	57,581 / 589
EU member	19. Belgium	56,511 / 9,212
	20. Pakistan	50,694 / 1,067
15. Indonesia	31. Indonesia	20,769 / 1,326
16. South Africa	34. South Africa	19,137 / 369
17. Japan	40. Japan	16,424 / 777
18. South Korea	45. South Korea	11,142 / 264
19. Argentina	48. Argentina	9,931 / 416
20. Australia	57. Australia	7,095 / 101
